Individual production measurements

without taking the material thickness into consideration

Note: The measurements you indicate should include all plus or minus allowances you may request.

Seat height to top of head	_____ cm	Right seat depth	_____ cm
Seat height to shoulder	_____ cm	Left seat depth	_____ cm
Seat height to armpit	_____ cm	Right calf length	_____ cm
Seat height to waist	_____ cm	Left calf length	_____ cm
Width at shoulder height	_____ cm	Shoe size	_____ cm
Width at chest height	_____ cm	Height approx.	_____ cm
Width at waist height	_____ cm	Body weight approx.	_____ cm
Width in seat region	_____ cm	Head circumference	_____ cm

Please understand that we cannot proceed unless the forms are completely filled out.

Color of the straps/restraints

Gray Black

Special color: _____

Upholstery

based on measurements based on molded custom contour (by means of soft foam method)

based on vacuum impression based on scan (STL file)

Information about fabric cover

Information about synthetic leather cover

Gray Black Blue Red

Special color: _____

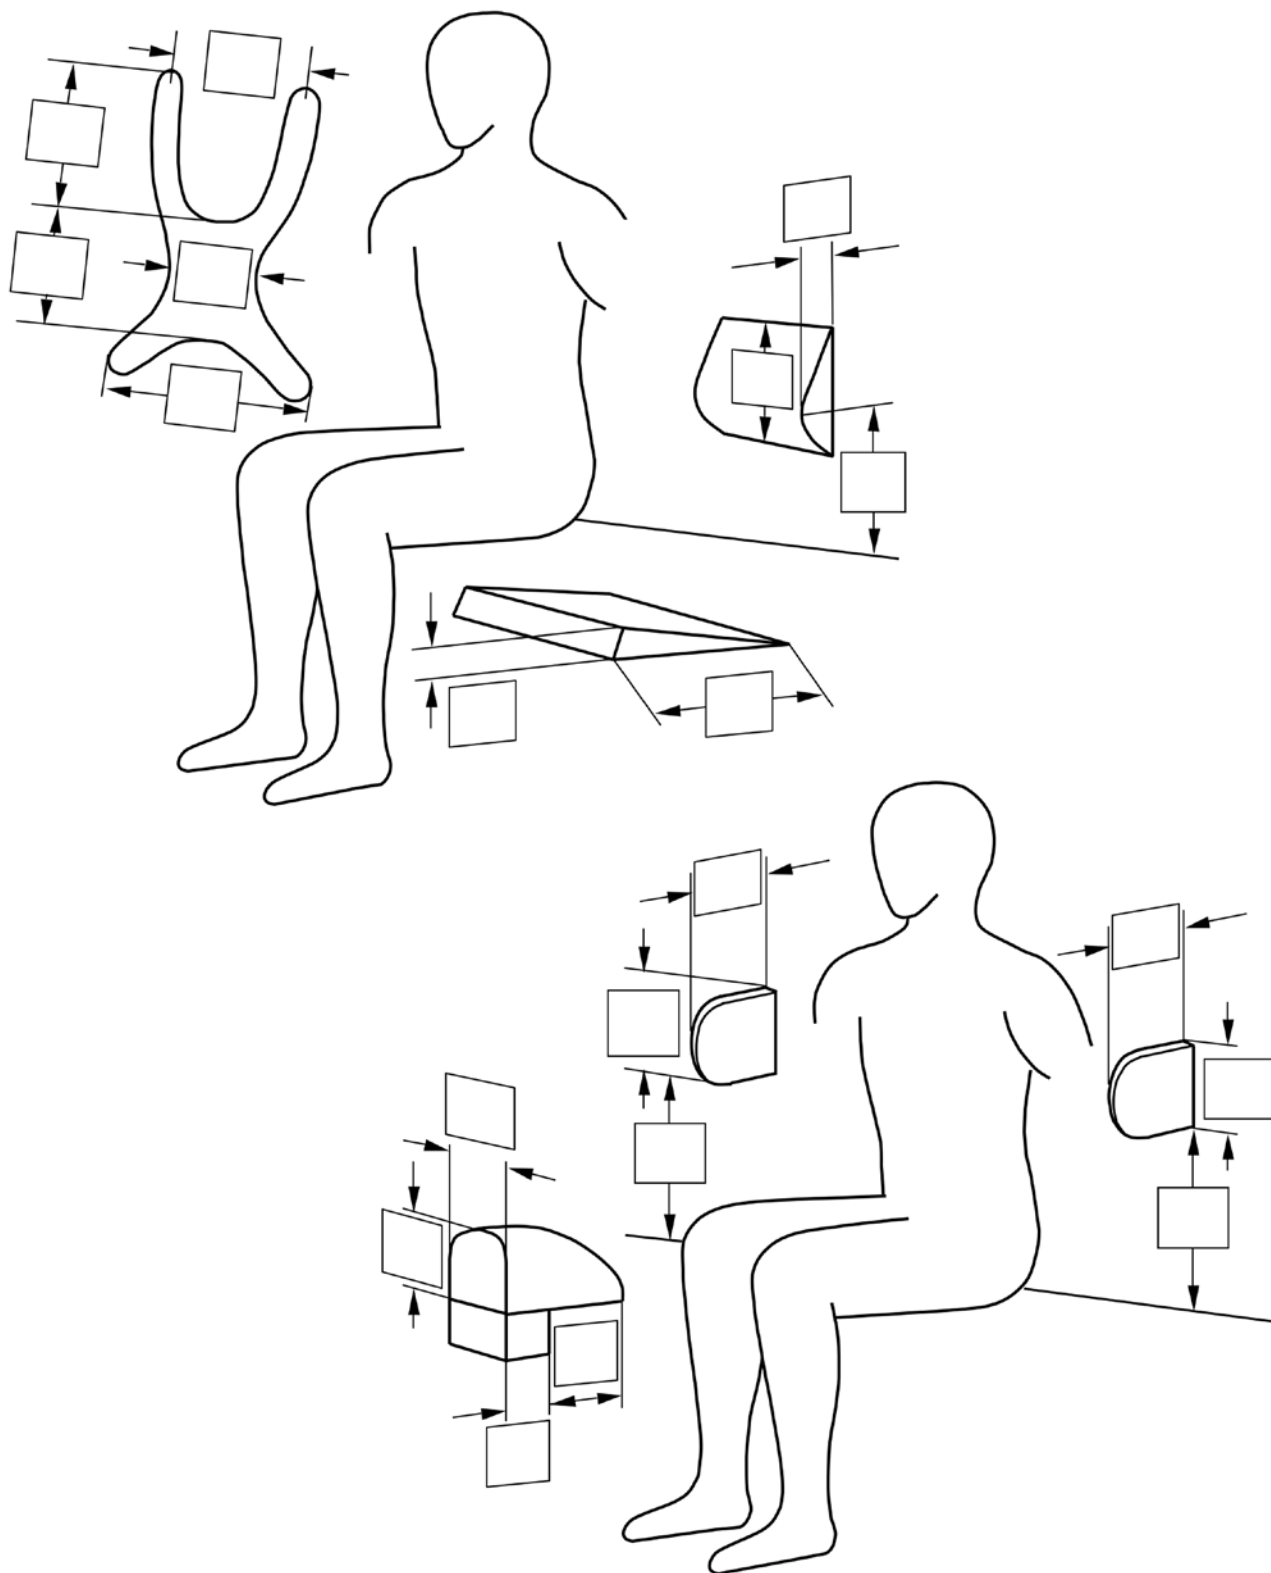

Information about undercarriage color

AKTIVLINE dynamic seat and back system

- ▶ made of aluminum with physiological pivot points in the pelvic and knee regions
- ▶ Pelvis adjustment unit and system restraint at 90°
- ▶ Anatomical molding in the seat with adduction guides
- ▶ Anatomical upholstery in the back with lateral side supports integrated
- ▶ Prepared for mounting of dynamic foot rest systems
- ▶ Prepared for mounting of restraints
- ▶ Adapter system and sliding rails for connecting the seat and back unit to selected undercarriages

Basic configuration

Leg rest system

- one-piece foot rest system
- two-piece leg rest system

assembled on

SIMPLY undercarriage

- 12" 16" 22" 24" wheels

Including wheels with drum brakes and full-floating rear axle, front wheels 200 x 50, parking brake handle with three latching positions, push bar with adjustable height and angle, pivotable support rollers, and adapter receptacle to accommodate the seat and back on sliding rails

alternatively assembled on

SIMPLY LIGHT undercarriage

- 12" 16" 22" 24" wheels

Including wheels with drum brakes and full-floating rear axle, front wheels 200 x 50, parking brake handle with three latching positions, push bar with adjustable height and angle, pivotable support rollers, anti-tip and adapter receptacle to accommodate the seat and back on sliding rails

alternatively assembled on

ROOMY NEW EDITION Indoor with 125 mm (or 100 mm) lightweight rollers

Including adapter receptacle to accommodate seat and back on sliding rails, including seat height and seat angle adjustment

- constructed with manual seat height adjustment by means of gas pressure springs
- constructed with electrical seat height adjustment (the push bar is needed for mounting an electric motor)
- removable push bar as an option

alternatively assembled on

an electric wheelchair purchased by the customer, of the type:

By e-mail to: info@interco-reha.de

Note

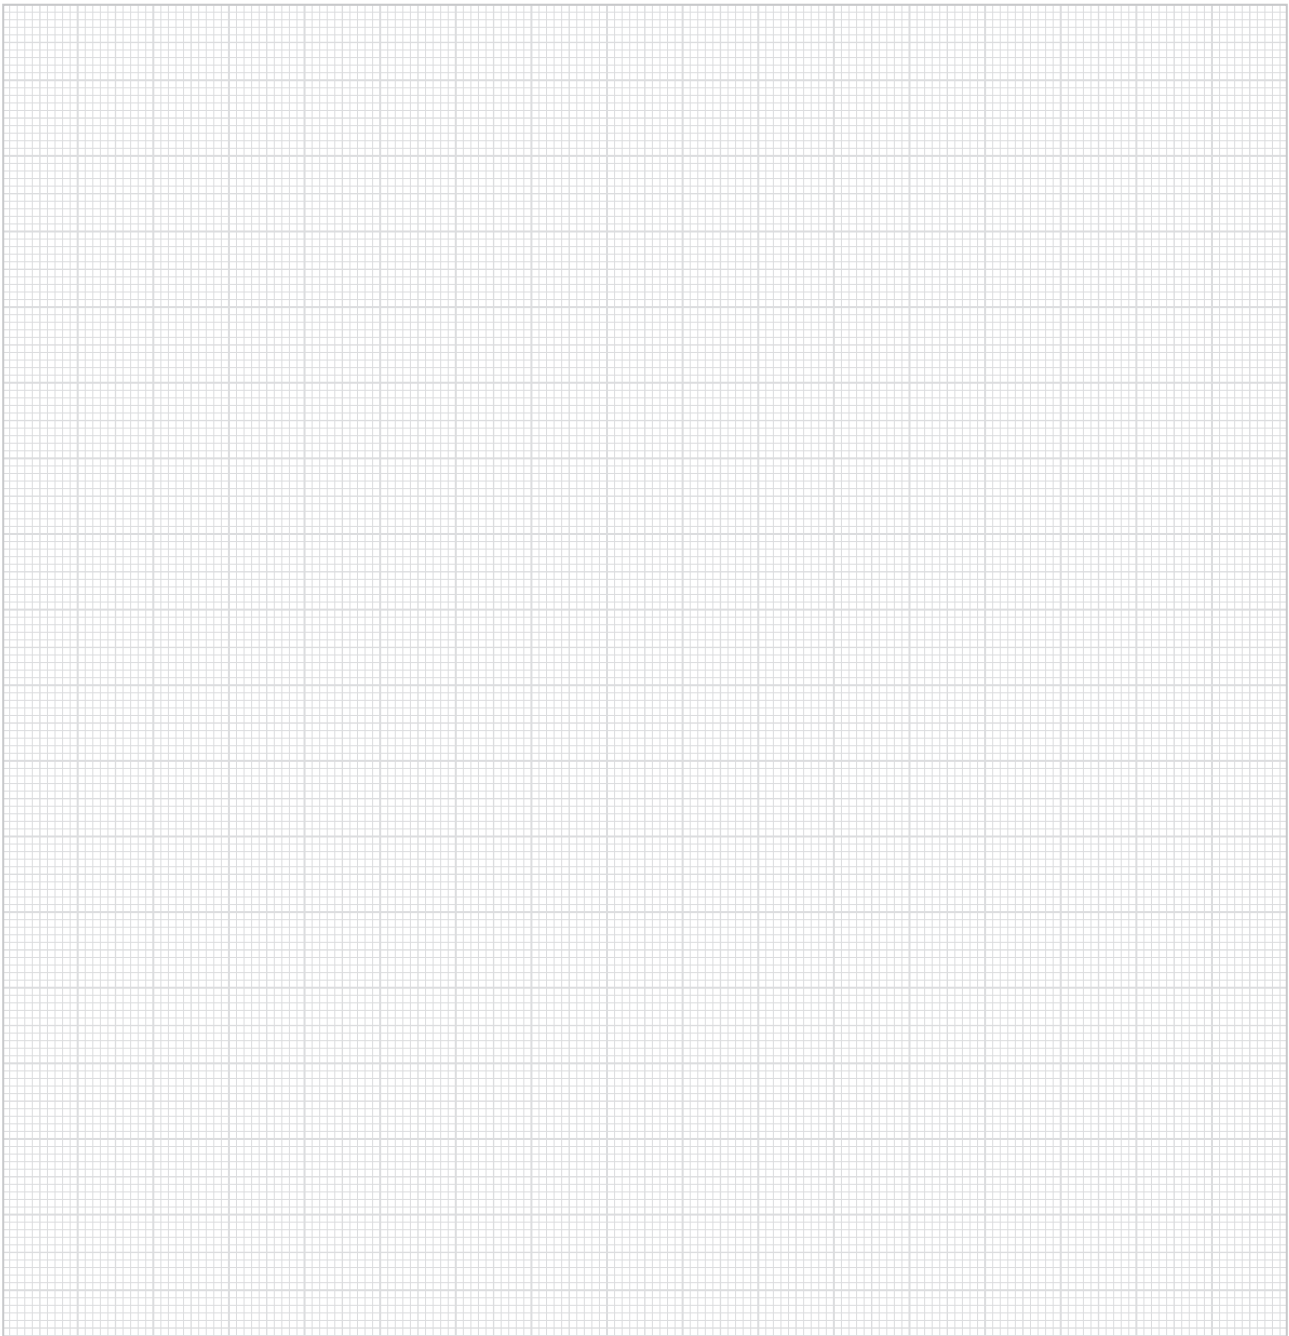

Please note that almost all options for additional special accessories can be custom-made. Please let us know what will be additionally needed for the patient, or sketch what you want on the next page.

Add-on components for medical devices, such as respirators, vacuum devices and/or oxygen bottles are possible. For these we need your detailed information about the type and possibly the dimensions of the devices.

At this point we wish you to know that the patient's measurements should be taken very carefully. Changes after the first trial sample are included in the prices provided they can result only from the trial sample and do not go beyond a bandwidth of +/- 10%.

Additional requirements beyond the first design will be billed separately; i.e. an extra charge must be applied for items that were not included in the original bid.

Notes

A large grid area for drawing or notes, consisting of a fine grid of small squares. The grid is approximately 30 units wide and 60 units high.
