

Hockey Proff

2017

Hockey Proff is CE-marked and TÜV-tested

Hockey Proff is a Norwegian produced hockey sledge of high quality. The frame is produced from super light weight high-grade steel, with a specially manufactured anodized iceskate bracket in aluminum.

Hockey Proff with Nordie Lightning carbon sticks

The low seat height combined with a vacuum cast plastic seat with padding, makes you sit safe and stable on the sledge.

The entire sledge weighs only 5 kg.

With a main frame in 3 different sizes and seat in 3 different sizes, the Hockey Proff will fit everyone from small children to big adults.

The seat and iceskate bracket can be adjusted independently forwards and backwards to find the correct balance point on the hockey sledge. If more support is needed, it is possible to get an anatomical sportseat, which has a higher backrest, which also provides good side support.

In order to capture the different level of the players, Hockey Proff is delivered with skate brackets in 4 different widths; 20 mm, 34 mm, 50 mm and 90 mm. The better you become, the narrower skate bracket you can use.

Standard equipment:

- Seat belts with fixlock buckle
- Footrest with fixlock buckle
- Iceskates including bracket

Seat belt with jacking mechanism.

Hockey Sticks

There are two different types of hockey sticks to Hockey Proff.

Hockey Stick, Nordic Lightning Carbon, with picks:

These are handmade in Norway. Hockey sticks Nordic Lightning Carbon will provide a very efficient power transmission, and weighs about 40 grams less than a hockey stick in composite.

Hockey Stick Warrior in composite, with picks:

Carbon provides Warrior hockey stick the rigidity that gives the best transmission. This is combined with glass fiber to increase strength and durability of the hockey sticks.

Pushbar

If you need help getting around on the ice you can mount a pushbar on the hockey sledge. It is angle adjustable and easy to mount/dismount.

Support Skates

If You've never played sledge hockey before, You can use support skates that are adjustable in width. These will make it easier for beginners and severely disabled to keep their balance without falling over. These can easily be removed when they are no longer needed.
